

## Renaissance Lighting Recycling Program

Renaissance Lighting enhances its sustainability practices by introducing the new Renaissance Lighting Recycling Program.

The program is designed to minimize the future impact of Renaissance Lighting products on already strained landfills.

“Green” Consumers seeking to replace their luminaires can safely and easily dispose of their Renaissance Lighting product without the worry of additional harmful effects to the environment.

*We recycle nearly **100%** of the luminaire including reflector, mounting frame, and light engine.*

### **How does it work:**

- Customers label the old Renaissance Lighting product as “Recycling Program”
- Customers are responsible for returning (shipping) the products to:
  - Renaissance Lighting
  - c/o Recycle Program
  - 480 Springpark Place Suite 900
  - Herndon, VA 20170
- \* If purchasing new Renaissance Lighting products, customers are encouraged to re-use the new product packing for recyclable returns.
- Damaged, obsolete, defective parts or products are segregated into bins
- Potomac Metals, a local recycling company, will collect the bins from Renaissance Lighting and re-cycle all parts of the luminaire including the reflector, mounting frame and light engine.

\* Please note: At this time this recycling program is limited to only Renaissance Lighting products

For more information about our Recycling Program please call our Customer Service Representatives at 1-703-707-9000
